

## Teen sex with older men (predators)

Alan Guttmacher Institute's 1994 report, "Sex and America's Teenagers," found that six of 10 girls who had sex before age 15 were coerced by males an average of six years their senior.

Nearly two-thirds (64%) of sexually active 15-17-year-old women have partners who are within two years of their age; 29% have sexual partners who are 3-5 years older, and 7% have partners who are six or more years older.
